

Recycle, Go Green – And keep it *Clean

*Clean = Free of blades, smooth edge and debris! Staples, off cuts and old foam products are acceptable.

Eliminating costly waste removal has caught the attention of many home furnishing manufactures, foam fabricators, carpet installers, and other converters of flexible polyurethane foam – FPF

Does it have your attention yet? Don't dump it! Recycle it! Reuse it!

Recycling provides both environmental and financial benefits:

- Local landfills are overflowing with waste, reduction efforts need to commence immediately;
 - It's an easy product to recycle once the collecting and transport issues are overcome;
 - Waste management costs will be greatly reduced for your company and your clients;
- **REBOUND RECYCLE** picks up *clean foam underlay products to save you money daily!
- Reduces costs to builders since the underwriting will not be in their garbage bins – saving space, saving the environment;
- Potential and existing clientele will be thrilled to know that the scrap and used foam will be recycled, everyone is aware of our landfills situation – it has a world renowned attention.

You have Nothing to lose and the Environment has Everything to Gain!

We Provide a Service to make it Easy for You to SAVE Money!

Have your company added to our weekly pickup schedule.

FORWARD MOVEMENT WITH IMPACT™ is EASY

TEXT or Call 403-771-9860 with location Anytime the Bin is Full

Just say yes to our service and your *clean Foam underlay products will be picked up.

Reduce ~ Reuse
Recycle ~ Respect

- Have **REBOUND RECYCLE** pickup your foam underlay products to save you money by reducing your waste management costs. As long as the products we retrieve are clean of, smooth edge and debris, we will always be readily available to pick up your foam products.
- The products we recycle will become new underlay, stuffing for pillows, beds and furniture. Almost every single piece of scrap is recyclable. This will go a long way to help reduce the cost of underlay going back out into the market. The short and long-term effects are beneficial to everyone, - and is especially beneficial to our environment.
- **REBOUND RECYCLE** is certain that your company's employees and contractors will be ready and willing to comply with keeping the materials clean and free of debris when they find out the positive effects that their efforts are going to have in our city landfills and on the environment as a whole.
- We know that both your existing and potential customers will be very attracted to the idea of doing business with your company when you tell them what you do with the foam products coming out of their renovated or newly built homes.
- The fact that the materials are not going to a local landfill is a huge factor in business relations over the World.
- Almost everyone is participating in saving the environment by providing or giving access to Eco friendly products for installations (Green Select Label Products) – this is your next step to becoming an Eco friendly business, - say “YES” to our easy to use pickup service.
- **REBOUND RECYCLE** encourages you to have “**FORWARD MOVEMENT WITH IMPACT**” – so that your company's recycling efforts are benefiting everyone.
- In keeping with boss of community involvement, the more contractors, dealers, distributors, manufactures, wholesalers and companies associated with the efforts – the more positive benefits we will all received today and in the future.
- “**FORWARD MOVEMENT WITH IMPACT**” says that we are all doing our part for the environment and continuing to move in the right direction.

“FORWARD MOVEMENT WITH IMPACT”
